

LESSON 4 — LIGHT & SHADOW

Practice Sheet

EXERCISE 1 — VALUE SCALE (9 STEPS)

Fill each box with a consistent, even tone from white (left) to black (right). Use hatching — no blending.

EXERCISE 2 — FIVE ELEMENTS OF SHADING

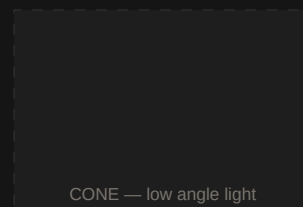

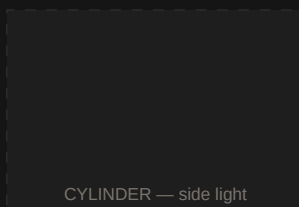

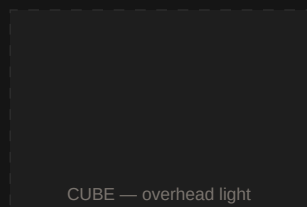

Label and shade each zone on the sphere: Highlight · Light · Shadow · Reflected Light · Cast Shadow.

■ LIGHT SOURCE

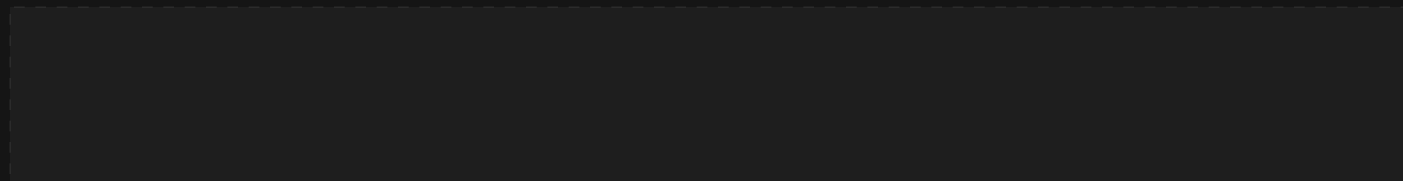

EXERCISE 3 — CAST SHADOW SHAPES

Draw the cast shadow for each object using the light direction arrow. Shadows converge toward the VP.

EXERCISE 4 — OCCLUSION SHADOWS

Darken the contact/crevice areas on each object. Occlusion is darkest at the point of contact.

Tip: Squint at your drawing — if value structure disappears, your lights and darks aren't separated enough.
